1. The new idea that I have come up with because of listening to other students is to make an app that would create a log of people who have visited the webpage and if they login again they would have to just verify that it is themselves.

2. An app should not take more permission from users as the users doesn't want to give up their privacy.

3. I think Airbnb's UI is pretty good as it easier for the user to start booking directly from the home screen which would make the user happy.

4. Yes, last class's discussions and/or items #1-3 gotten you closer toward a mobile app you would like to pursue as a project for this course because discussing about the projects and getting to know what people's thinking is lead me to think differently and also use some of their ideas too.
